

## **Labour Market Indicators – Monthly unemployment rates**

Please use the following reference when sourcing the unemployment rates posted on the Sarnia Lambton Workforce Development Board (SLWDB) website:

Source: C4SE based on Statistics Canada EI benefits data, Statistics Canada Economic Region 570 labour force survey estimates, and on C4SE labour force estimates

- OR -

Source: C4SE based on data from Statistics Canada and C4SE

C4SE is the [Centre for Spatial Economics](#).

Please note that these monthly estimates are a customized data request made by SLWDB to C4SE. Statistics Canada only releases monthly unemployment rates based upon the labour force survey estimates for Economic Region 570 which rolls-up Sarnia Lambton with Chatham-Kent and Windsor-Essex. Statistics Canada does not release a monthly unemployment rate for Sarnia Lambton because the sample survey size is too small to meet their requirements for statistical accuracy. The rates quoted on the SLWDB site are estimates based on a combination of labour force survey data for Economic Region 570 and on employment insurance benefit recipient data for each of S-L, W-E and C-K areas.
